

# GARAGE MANAGEMENT SYSTEM

By

Bodananapalli Harshitha

harshithareddy2929@gmail.com

# Project Abstraction

The Garage Management System is a web-based tool designed to manage and track all garage operations. The system aims to provide a centralized platform for garage owners to monitor and control their business activities, including employee management, inventory tracking, and customer service. The system is built on the Salesforce platform, which provides a robust and secure infrastructure for managing and storing data. The Salesforce platform also offers a wide range of tools and features that can be used to customize and extend the system to meet the specific needs of the garage business.

One of the key features of the Garage Management System is its employee management module. This module allows garage owners to keep track of all their employees, including their contact information, work schedules, and job assignments. The system also provides tools for managing employee performance, such as tracking attendance and evaluating performance.

The Garage Management System also includes a customer service module, which allows garage owners to keep track of all their customers and their interactions with the garage. The system provides tools for managing customer information, such as contact details and service history, as well as tools for scheduling appointments and tracking customer feedback.

# INTRODUCTION

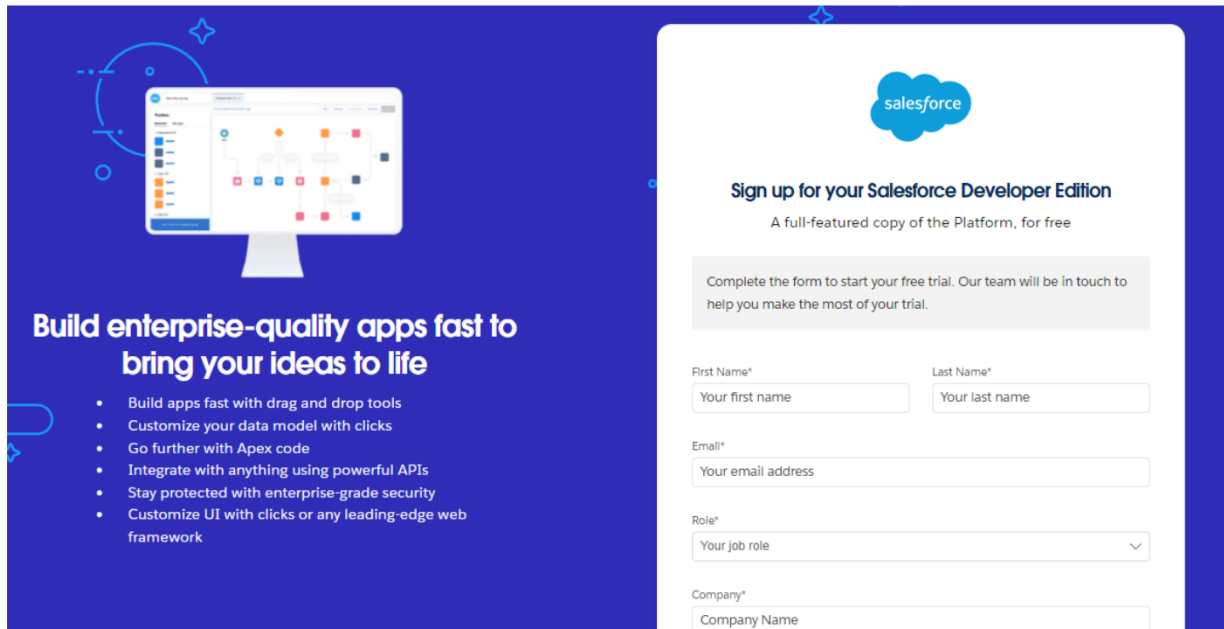

The Garage Management System is a comprehensive solution designed to optimize the usage of vehicles and trailers that carry inventories to stores. The system aims to streamline the management of vehicle records, track vehicles, and ensure efficient inventory transportation. The Garage Management System will be built on the Salesforce platform, leveraging its robust architecture and scalability. The system will consist of several components, including vehicle records, inventory management, workflow automation, and integration with other Salesforce modules. The implementation strategy will involve requirements gathering, design, development, testing, and deployment. The abstraction framework for the system will use an Integration Procedure to get input from a workflow, query the product model based on that input, and update products, attributes, and inventory levels. The Garage Management System will provide a flexible and scalable architecture for managing and optimizing inventory transportation, ensuring efficient vehicle utilization, and automating business processes.

## TASK 1:

### **Creating Developer Account:**

#### **Creating a developer org in salesforce.**

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :
3. First name & Last name
4. Email
5. Role : Developer
6. Company : College Name
7. County : India
8. Postal Code : pin code
9. Username : should be a combination of your name and company  
This need not be an actual email id, you can give anything in the format : username@organization.com
10. Click on sign me up after filling these.

The image shows a promotional banner for Salesforce Developer Edition on the left and a sign-up form on the right. The banner features a computer monitor displaying a Salesforce interface and a list of benefits. The sign-up form includes the Salesforce logo, a title, a subtitle, a description, and several input fields for user information.

**Build enterprise-quality apps fast to bring your ideas to life**

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

**Sign up for your Salesforce Developer Edition**  
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name\*  Last Name\*

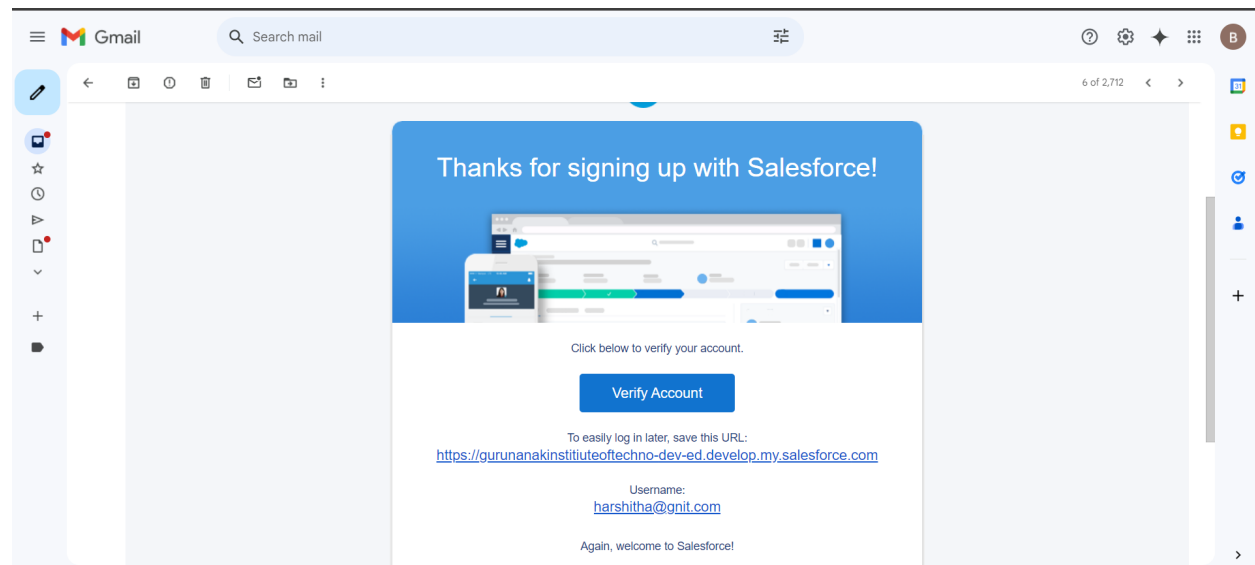

Email\*

Role\*

Company\*

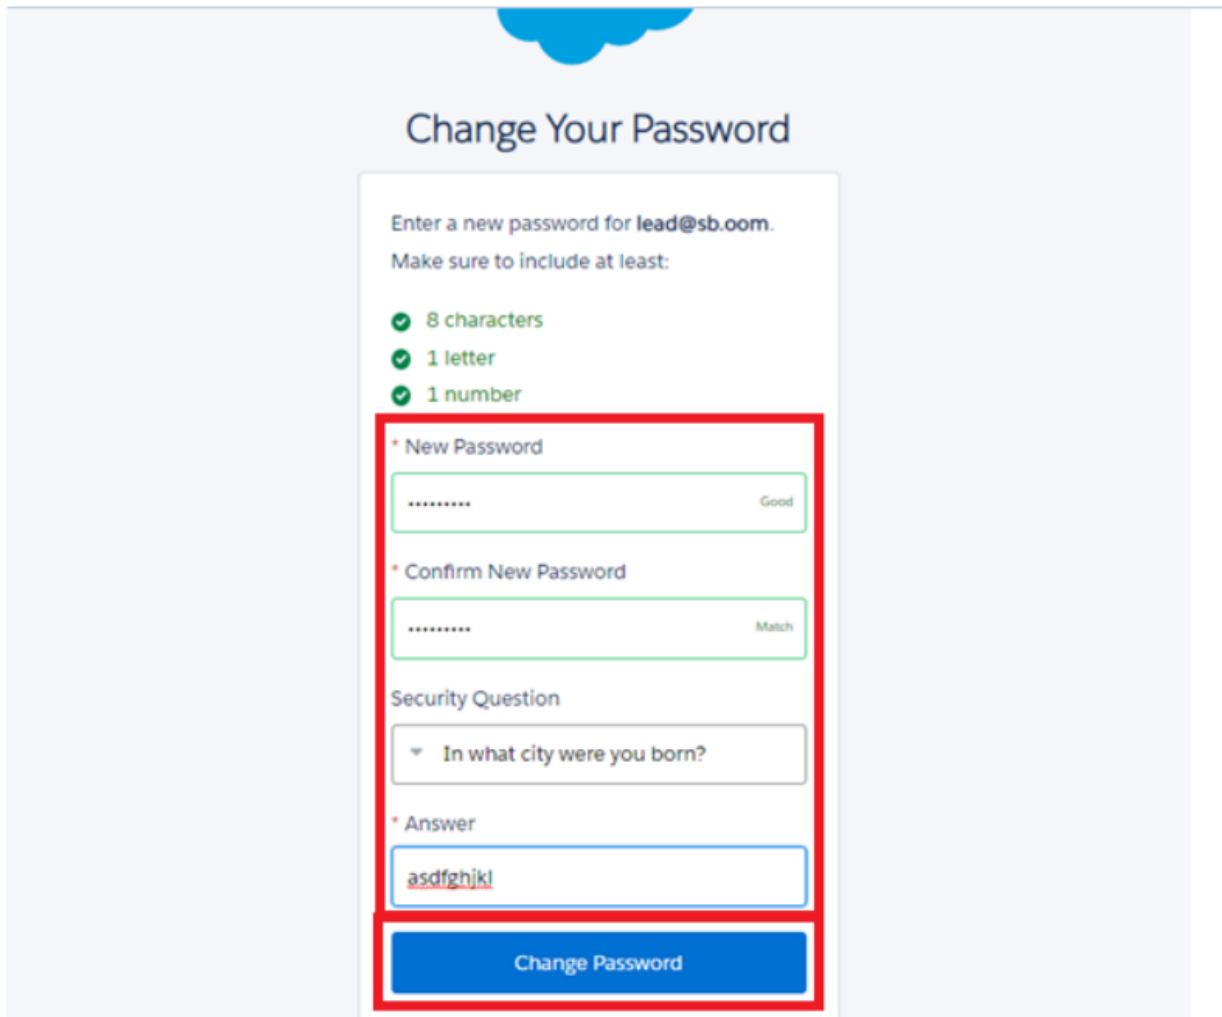

## Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for lead@sb.oom.  
Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

\* New Password  
[password field] Good

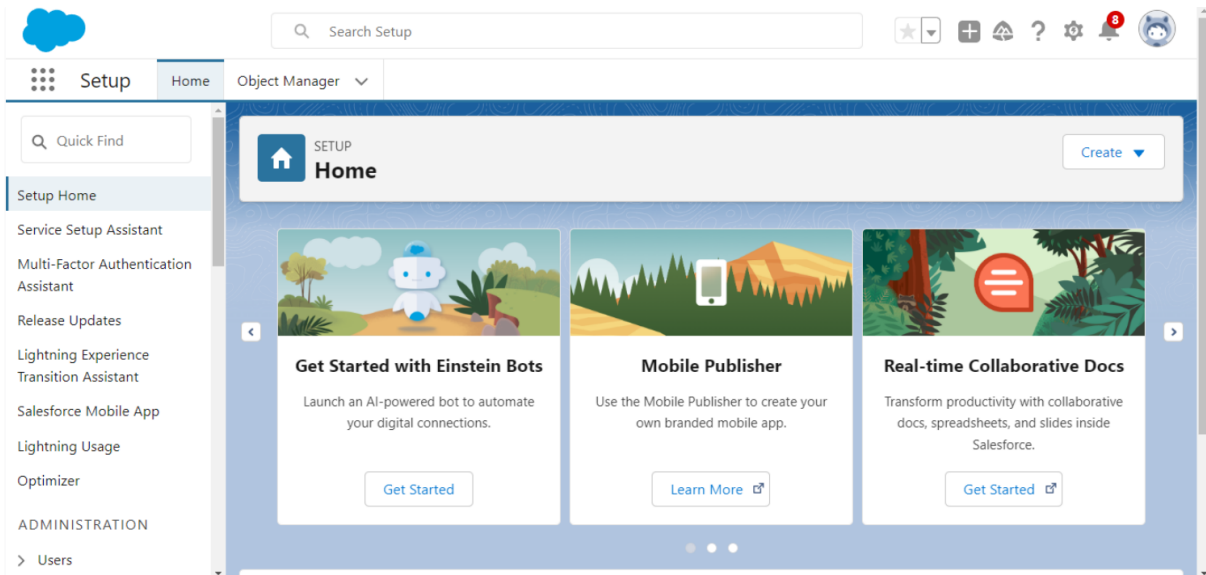

\* Confirm New Password  
[password field] Match

Security Question  
▼ In what city were you born?

\* Answer  
[answer field] asdfghjkl

Change Password

4. Then you will redirect to your salesforce setup page

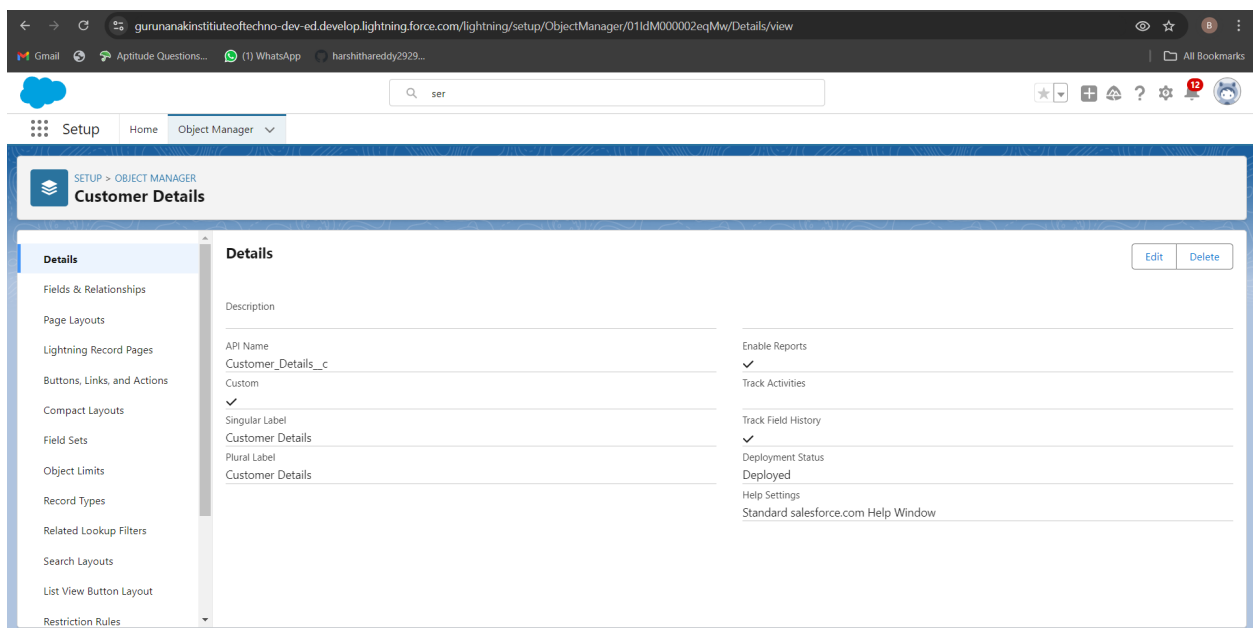

## TASK 2: CREATING THE OBJECTS

### i) Create Customer Details Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click Custom Object.
1. Enter the label name >> Customer Details
2. Plural label name >> Customer Details
3. Enter Record Name Label and Format
  - Record Name >> Customer Name
  - Data Type >> Text
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

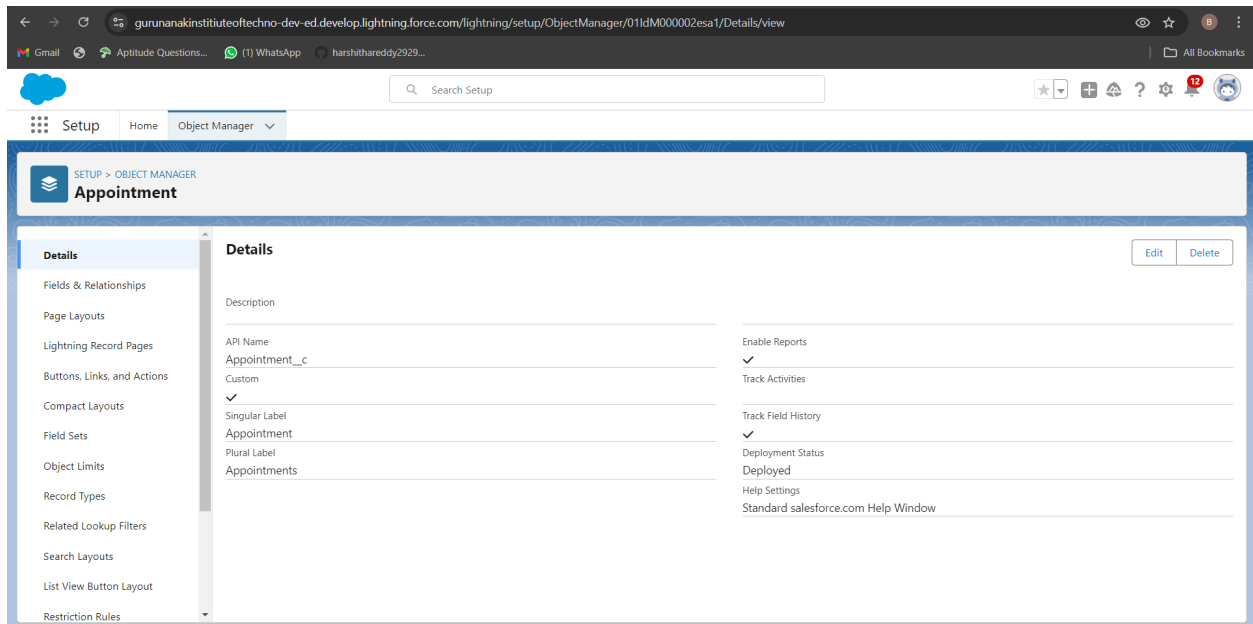

### ii) Create Appointment Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Appointment
2. Plural label name >> Appointments
3. Enter Record Name Label and Format
  - Record Name >> Appointment Name
  - Data Type >> Auto Number
  - Display Format >> app-{000}
  - Starting number >> 1

2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

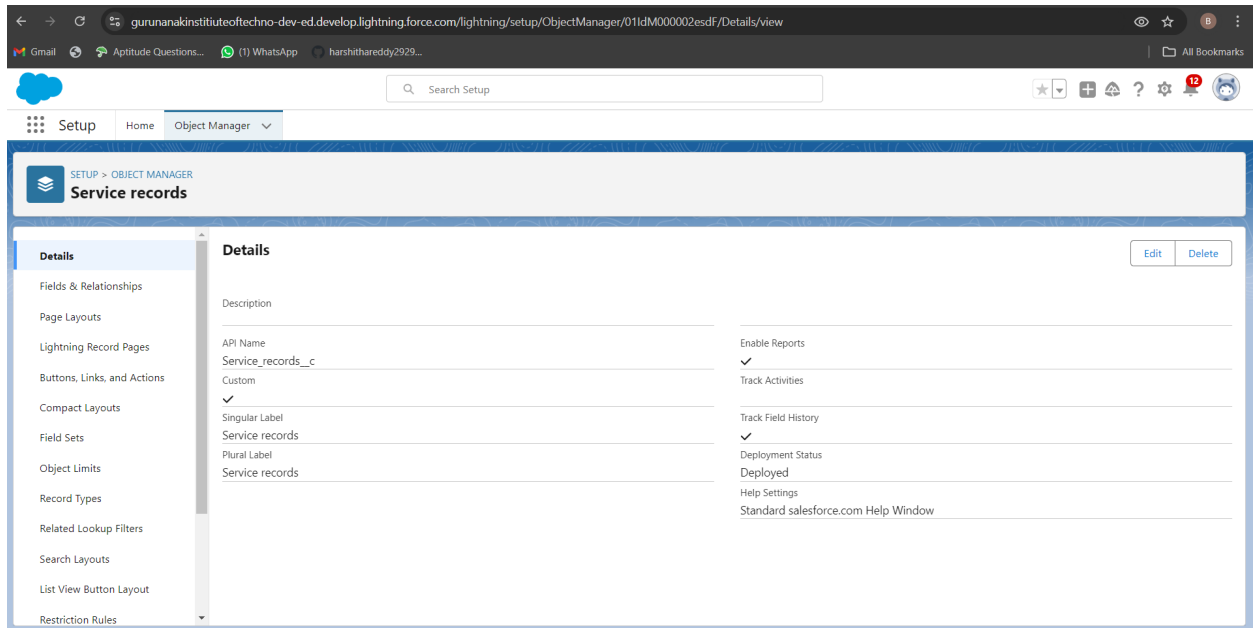

### iii) Create Service Records Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Service records
2. Plural label name >> Service records
3. Enter Record Name Label and Format
  - Record Name >> Service records Name
  - Data Type >> Auto Number
  - Display Format >> ser-{000}
  - Starting number >> 1
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

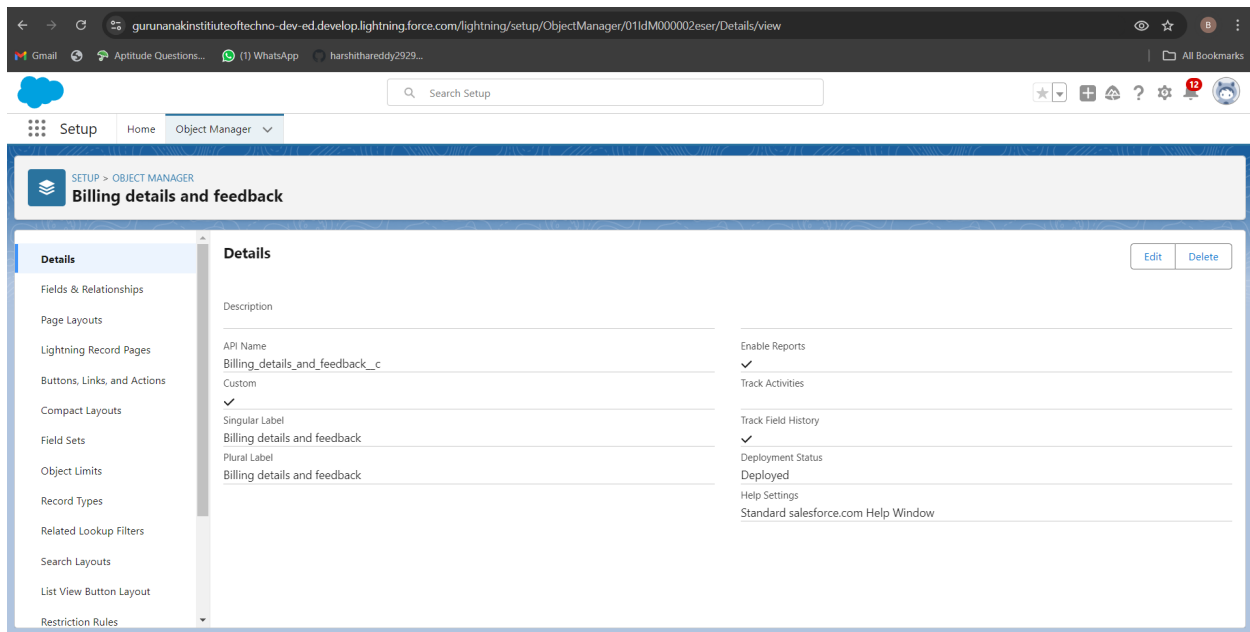

#### iv) Create Billing Details And Feedback Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Billing details and feedback
2. Plural label name >> Billing details and feedback
3. Enter Record Name Label and Format
  - Record Name >> Billing details and feedback Name
  - Data Type >> Auto Number
  - Display Format >> bill-{000}
  - Starting number >> 1
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

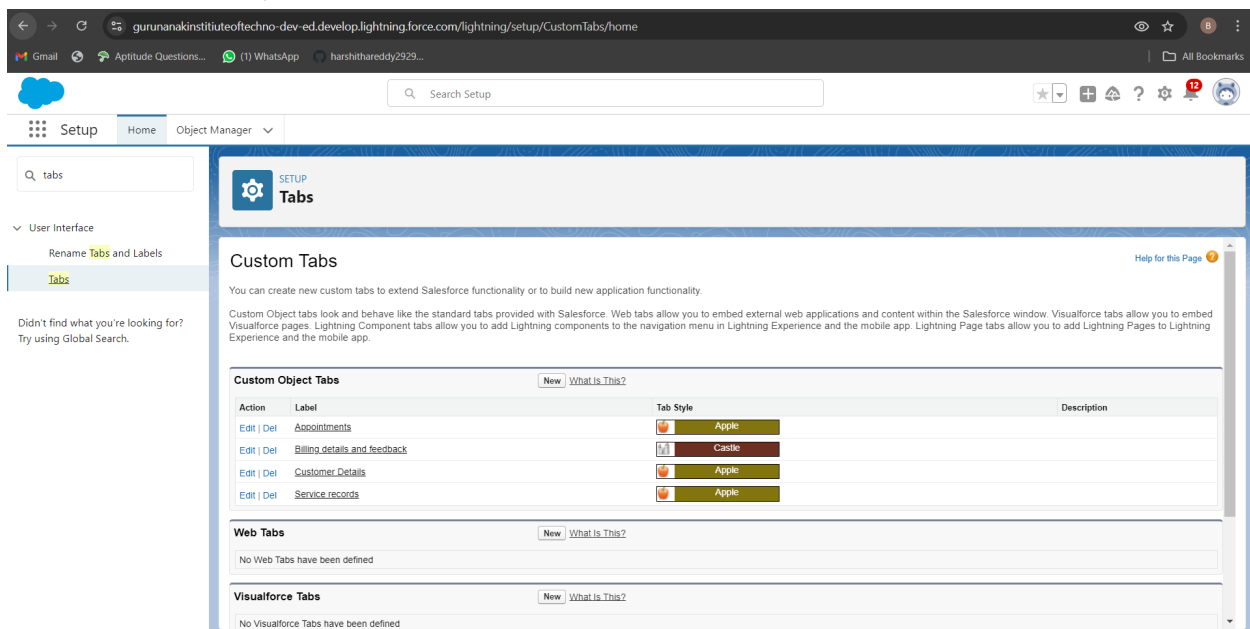

## TASK 3:CREATE TABS

### Creating A Custom Tab

#### To create a Tab:(Customer Details)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)

2. Select Object(Customer Details) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .

3. Make sure that the Append tab to users' existing personal customizations is checked.

#### 4. Click save.

**New Custom Object Tab** Help for this Page

**Step 1. Enter the Details** Step 1 of 3

Choose the custom object for this new custom tab. Fill in other details.

Select an existing custom object or [create a new custom object now](#).

Object:

Tab Style: 

(Optional) Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab.

Splash Page Custom Link:

Enter a short description.

Description:

Next Cancel

**Tab Style Selector** Create your own style

Hide styles which are used on other tabs

 Airplane	 Alarm clock	 Apple	 Balls
 Bank[1]	 Bell	 Big top	 Boat[1]

### To create a Tab:(Appointment)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object(Appointment) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save

### **To create a Tab:(Service Records)**

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object(Service Records) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save

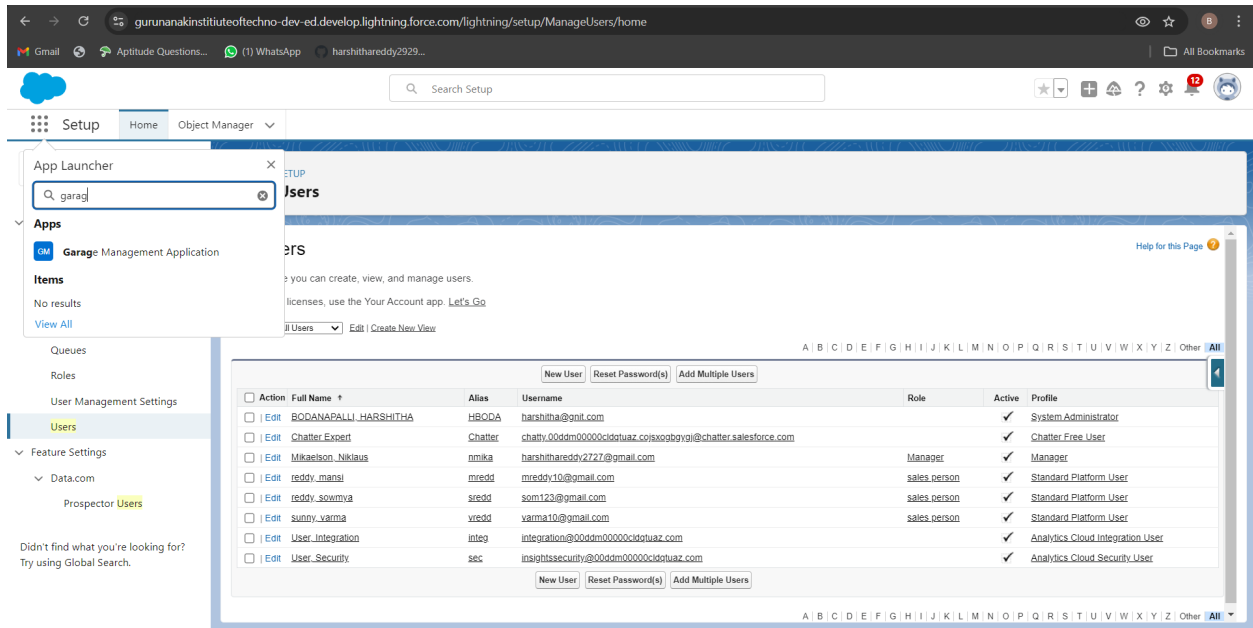

### **To create a Tab:(Billing details and feedback)**

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object(Billing details and feedback) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save

## **TASK 4:CREATE THE LIGHTNING APP**

To create a lightning app page:

1. Go to setup page >> search “app manager” in quick find >> select “app manager” >> click on New lightning App.
2. Fill the app name in app details as Garage Management Application >> Next >> (App option page) keep it as default >> Next >> (Utility Items) keep it as default >> Next.
3. To Add Navigation Items:
4. Select the items (Customer Details,Appointments, Service records, Billing details and feedback, Reports and Dashboards) from the search bar and move it using the arrow button >> Next.
5. To Add User Profiles:  
Search profiles (System administrator) in the search bar >> click on the arrow button >> save & finish.

## TASK 5:CREATE THE FIELDS

### 1. To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Customer Details) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select Data Type as a "Phone"
4. Click on next.
5. Fill the Above as following:
  - Field Label: Phone number
  - Field Name : gets auto generated
  - Click on Next >> Next >> Save and new.

Note: Follow the above steps for the remaining field for the same object.

### 2. To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Customer Details) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select Data type as a "Email" and Click on Next
4. Fill the Above as following:
  - Field Label : Gmail
  - Field Name : gets auto generated
  - Click on Next >> Next >> Save and new.

## Creation Of Lookup Fields

### **Creation of Lookup Field on Appointment Object :**

1. Go to setup >> click on Object Manager >> type object name( Appointment ) in the search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select "Look-up relationship" as data type and click Next.
4. Select the related object " Customer Details" and click next.
5. Next >> Next >> Save.

Note: Make sure you complete Activity 4 Before continuing.

### **Creation of Lookup Field on Service records Object :**

1. Go to setup >> click on Object Manager >> type object name( Service records ) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New
3. Select "Look-up relationship" as data type and click Next.
4. Select the related object " Appointment " and click next.
5. Make it a required field so click on Required.
6. Scroll down for Lookup Filter and click on Show filter settings.
7. Now add the filter criteria.
8. Field : Appointment: Appointment Date >> Operator : less than >> select field >> Appointment: Created Date
9. Filter type should be Required.
10. Error Message : Value does not match the criteria.
11. Enable the filter by click on Active.
12. Next >> Next >> Save.

### **Creation of Lookup Field on Billing details and feedback Object :**

1. Go to setup >> click on Object Manager >> type object name( Billing details and feedback ) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "Look-up relationship" as data type and click Next.
4. Select the related object " Service records" and click next.
5. Next >> Next >> Save & new.

## **Creation Of Checkbox Fields**

### **Creation of Checkbox Field on Appointment Object :**

1. Go to setup >> click on Object Manager >> type object name( Appointment ) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "Check box" as data type and click Next.
4. Give the Field Label : Maintenance service

5. Field Name : is auto populated
6. Default value : unchecked
7. Click on next >> next >> save.

#### **Creation of Another Checkbox Field on Appointment Object :**

1. Repeat the steps form 1 to 3.
2. Give the Field Label : Repairs
3. Field Name : is auto populated
4. Default value : unchecked
5. Click on next >> next >> save.
6. Follow the same and create another checkbox with given names
7. Give the Field Label : Replacement Parts
8. Field Name : is auto populated
9. Default value : unchecked
10. Click on next >> next >> save.

#### **Creation of Checkbox Field on Service records Object :**

1. Go to setup >> click on Object Manager >> type object name( Service records ) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "Check box" as data type and click Next.
4. Give the Field Label : Quality Check Status
5. Field Name : is auto populated
6. Default value : unchecked
7. Click on next >> next >> save

#### **Creation Of Date Fields**

##### **Creation of Date Field on Appointment Object :**

1. Go to setup >> click on Object Manager >> type object name( Appointment ) in the search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "Date" as data type and click Next.
4. Give the Field Label : Appointment Date
5. Field Name : is auto populated
6. Make it as a Required field by click on the Required option.
7. Click on next >> next >> save.

#### **Creation Of Currency Fields**

##### **Creation of Currency Field on Appointment Object :**

1. Go to setup >> click on Object Manager >> type object name( Appointment ) in the search bar >> click on the object.

2. Now click on "Fields & Relationships" >> New.
3. Select "Currency" as data type and click Next.
4. Give the Field Label : Service Amount
5. Field Name : is auto populated
6. Click on next
7. Give read only for all the profiles in field level security for profile.
8. Click on next > > save.

#### **Creation of Currency Field on Billing details and feedback Object :**

1. Follow the same steps as mentioned above in Billing details and feedback Object.
2. Change the label name as mentioned.
3. Give the Field Label : Payment Paid
4. Field Name : is auto populated

#### **Creation Of Text Fields**

1. Go to setup >> click on Object Manager >> type object name( Appointment ) in the search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "Text" as data type and click Next.
4. Give the Field Label : Vehicle number plate
5. Field Name : is auto populated
6. Length : 10
7. Make field as Required and Unique.
8. Click on next >> next >> save.

#### **Creation of Text Fields in Billing details and feedback object :**

1. Go to setup >> click on Object Manager >> type object name( Billing details and feedback ) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "text" as data type and click Next.
4. Give the Field Label : Rating for service
5. Field Name : is auto populated
6. Length : 1
7. Make field as Required and Unique.
8. Click on next >> next >> save

#### **Creation Of Picklist Fields**

##### **Creation of Picklist Fields in Service records object :**

1. Go to setup >> click on Object Manager >> type object name(Service records) in search bar >> click on the object.
2. Click on fields & relationship >> click on New.

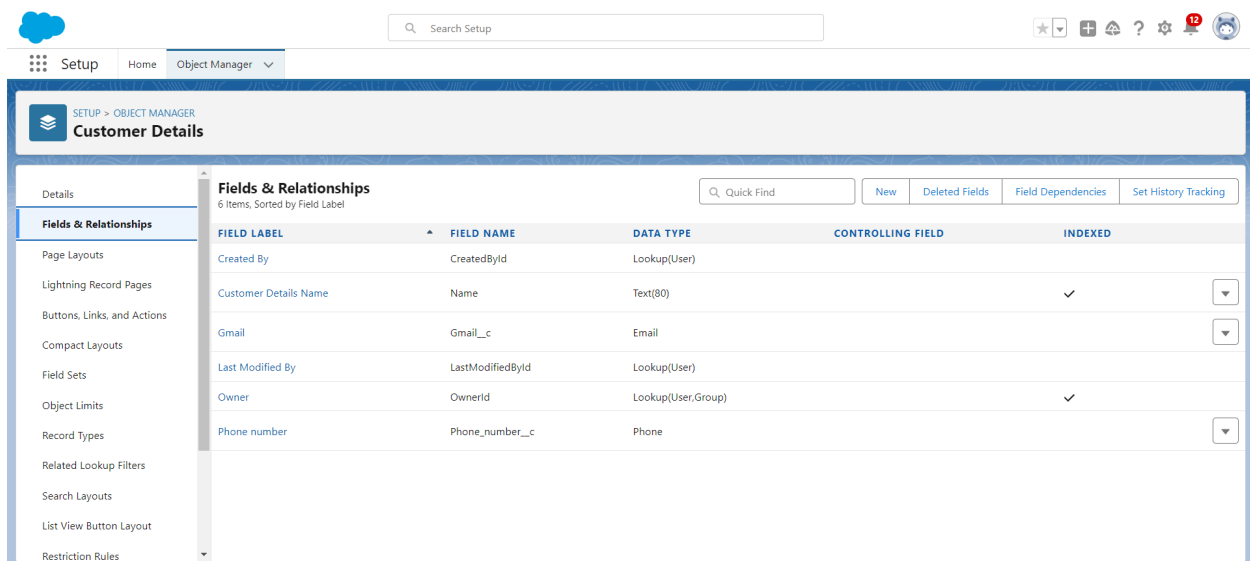

3. Select Data type as “Picklist” and click Next.
4. Enter Field Label as “Service Status”, under values select “Enter values, with each value separated by a new line” and enter values as shown below.
5. The values are: Started, Completed
6. Click Next.
7. Next >> Next >> Save.

### Creation of Picklist Fields in Billing details and feedback object :

1. Go to setup >> click on Object Manager >> type object name(Billing details and feedback) in search bar >> click on the object.
2. Click on fields & relationship >> click on New.
3. Select Data type as “Picklist” and click Next.
4. Enter Field Label as “Payment Status”, under values select “Enter values, with each value separated by a new line” and enter values as shown below.
5. The values are: Pending, Completed.
6. Click Next.

### Creating Formula Field In Service Records Object

1. Go to setup >> click on Object Manager >> type object name(Service records) in search bar >> click on the object.
2. Click on fields & relationship >> click on New.
3. Select Data type as “Formula” and click Next.
4. Give Field Label and Field Name as “service date” and select formula return type as “Date” and click next.
5. Insert field formula should be : CreatedDate
6. click “Check Syntax” .
7. Click next >> next >> Save.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes a search bar labeled "Search Setup" and several utility icons. Below the navigation bar, the breadcrumb trail reads "Setup > OBJECT MANAGER". The main heading is "Customer Details". On the left, a sidebar menu lists various setup options, with "Fields & Relationships" selected. The main content area displays a table of fields for the "Customer Details" object, sorted by Field Label. The table has columns for FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are: Created By, Customer Details Name, Gmail, Last Modified By, Owner, and Phone number.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED

## To Create A Duplicate Rule To An Customer Details Object

1. Go to quick find box in setup and search for Duplicate rules.
2. Click on Duplicate rule >> click on New Rule >> select customer details object.
3. Give the Rule name as : Customer Detail duplicate
4. Scroll a little in Matching rule section
5. Select the matching rule : Matching customer details
6. And Click on save.
7. After saving the Duplicate Rule, Click on Activate.

The screenshot shows the 'Matching Rules' configuration page in Salesforce. The 'Compare Customer Details With' dropdown is set to 'Customer Details'. The 'Matching Rule' dropdown is set to 'matching Customer details', which is highlighted with a green arrow. Below this, the 'Matching Criteria' are listed: '(Customer Details: Email EXACT MatchBlank = FALSE) AND (Customer Details: Phone\_Number EXACT MatchBlank = FALSE)'. The 'Field Mapping' section shows 'Mapping Selected' with a green checkmark. At the bottom, there are buttons for 'Add Rule', 'Remove Rule', 'Save', 'Save & New', and 'Cancel'. A green arrow points to the 'Save' button.

## TASK 8:CREATE PROFILES

### Manager Profile

To create a new profile:

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User) >> enter profile name (Manager) >> Save.

The screenshot shows the 'Clone Profile' page in Salesforce. The 'Existing Profile' dropdown is set to 'Standard User'. The 'User License' is 'Salesforce'. The 'Profile Name' text field contains 'Manager'. A red arrow points to the 'Save' button at the bottom right. On the left sidebar, a red arrow points to the 'Profiles' link under the 'Users' section.

2. While still on the profile page, then click Edit.

**Profile Manager**

Users with this profile have the permissions and page layouts listed below. Administrators can change a user's profile by editing that user's personal information.

If your organization uses Record Types, use the Edit links in the Record Type Settings section below to make one or more record types available to users with this profile.

5. Changing the session times out after should be " 8 hours of inactivity".

6. Change the password policies as mentioned :

7. User passwords expire in should be " never expires ".

8. Minimum password length should be " 8 ", and click save

## Sales Person Profile

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Salesforce Platform User) >> enter profile name (sales person) >> Save.

2. While still on the profile page, then click Edit.

3. Select the Custom App settings as default for the GARage management.

4. Scroll down to Custom Object Permissions and Give access permissions for Appointments, Billing details and feedback, service records and customer details objects as mentioned in the below diagram.

5. And click save.

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with 'profiles' entered and a list of items including 'Users' and 'Profiles'. The main content area is titled 'Profiles' and shows the details for the 'Standard Platform User' profile. It includes a list of permissions (Login IP Ranges, Apex Class Access, Visualforce Page Access, External Data Source Access, Named Credential Access, External Credential Principal Access, Custom Metadata Type Access, Custom Setting Definitions Access, Flow Access, Service Presence Status Access, Custom Permissions) and a 'Profile Detail' section with fields for Name, User License, Created By, Custom Profile, and Modified By. Below this is a 'Page Layouts' section with a table of assignments.

Page Layouts

## TASK 9:Role & Role Hierarchy

Creating Manager Role:

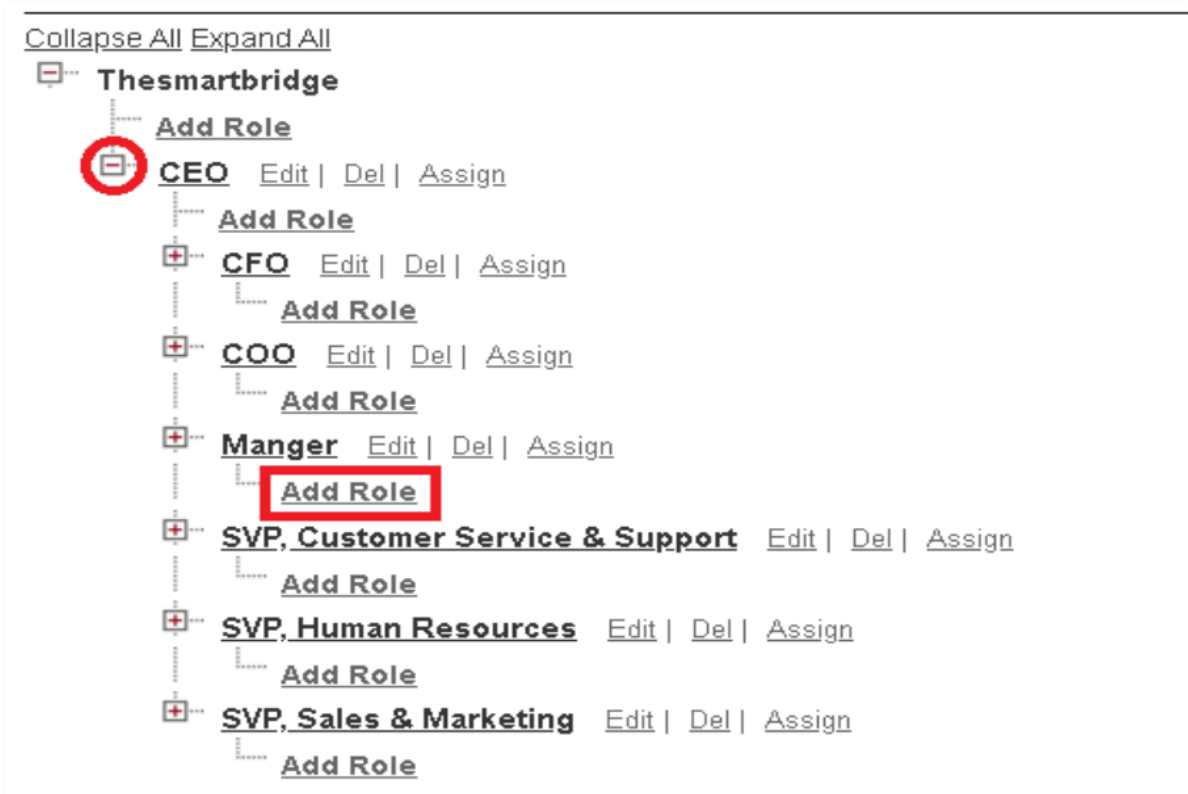

1. Go to quick find >> Search for Roles >> click on set up roles.
2. Click on Expand All and click on add role under whom this role works.
3. Give Label as "Manager" and Role name gets auto populated. Then click on Save.

## Creating Another Roles

Creating another two roles under manager

1. Go to quick find >> Search for Roles >> click on set up roles.
2. Click plus on CEO role, and click add role under manager.
3. Give Label as "sales person" and Role name gets auto populated. Then click on Save.

## TASK 10:USERS

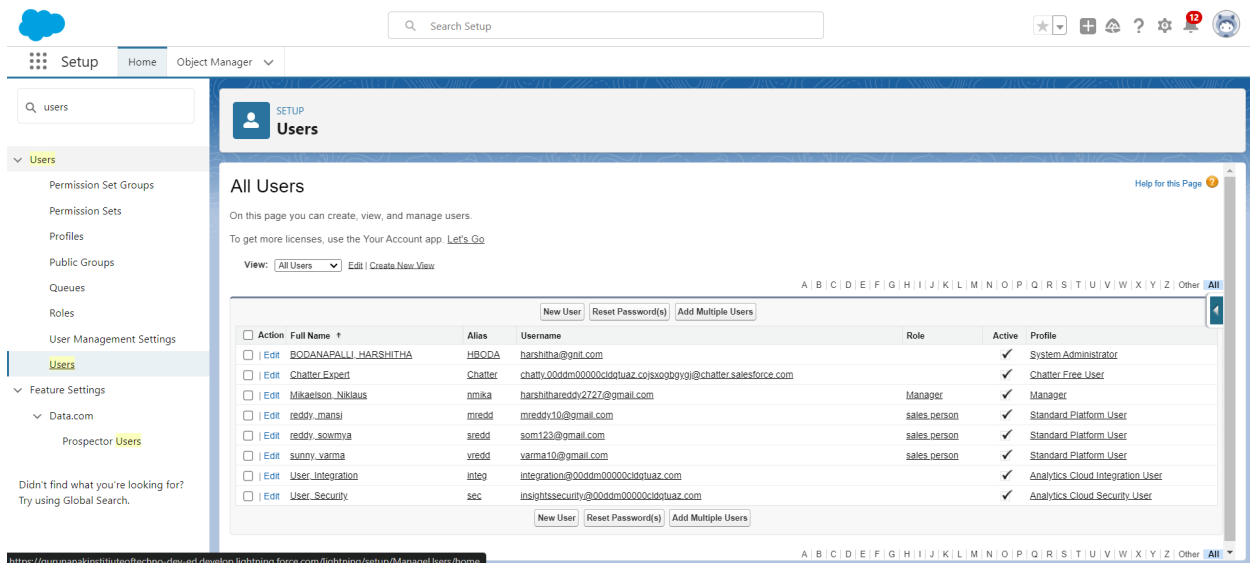

### Create User

i. Go to setup >> type users in quick find box >> select users >> click New user.

ii. Fill in the fields

1. First Name : Nicklaus
2. Last Name : Mikaelson
3. Alias : Give a Alias Name
4. Email id : Give your Personal Email id
5. Username : Username should be in this form: text@text.text
6. Nick Name : Give a Nickname
7. Role : Manager
8. User license : Salesforce
9. Profiles : Manager

iii. Save.

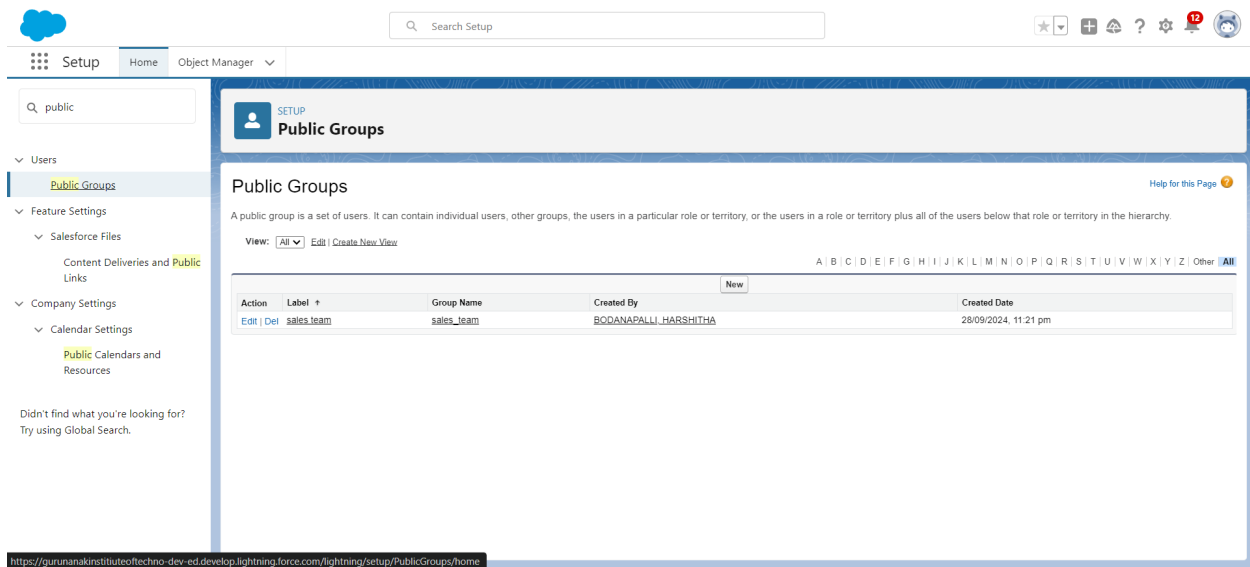

The screenshot shows the Salesforce Setup interface with the 'Users' section selected in the left sidebar. The main content area is titled 'All Users' and includes a search bar, a list of users, and a table of user details. The table has columns for Action, Full Name, Alias, Username, Role, Active, and Profile. The users listed are: System Administrator, Chatter Free User, Manager, Standard Platform User, and Analytics Cloud Integration User. The URL at the bottom is https://gurunakinsituteoftechno-dev-ed.develop.lightning.force.com/lightning/setup/ManageUsers/home.

## TASK 11:PUBLIC GROUPS

### Creating New Public Group

1. Go to setup >> type users in quick find box >> select public groups >> click New.
2. Give the Label as "sales team".
3. Group name is auto populated.
4. Search for Roles.
5. In Available Members select Sales person and click on add it will be moved to selected member.
6. Click on save

The screenshot shows the Salesforce Setup interface with the 'Public Groups' section selected in the left sidebar. The main content area is titled 'Public Groups' and includes a search bar, a list of public groups, and a table of public group details. The table has columns for Action, Label, Group Name, Created By, and Created Date. The public group listed is 'sales\_team'. The URL at the bottom is https://gurunakinsituteoftechno-dev-ed.develop.lightning.force.com/lightning/setup/PublicGroups/home.

## TASK 12:SHARE SETTING

### Creating Sharing Settings

1. Go to setup >> type users in quick find box >> select Sharing Settings >> click Edit.
2. Change the OWD setting of the Service records Object to private as shown in fig.

- Click on save and refresh.
- Scroll down a bit, Click new on Service records sharing Rules.
- Give the Label name as " Sharing setting"
- Rule name is auto populated.
- In step 3 : Select which records to be shared, members of " Roles " >> " Sales person"
- In step 4: share with, select " Roles " >> " Manager "
- In step 5 : Change the access level to " Read / write " .
- Click on save.

**Sharing Settings**

This page displays your organization's sharing settings. These settings specify the level of access your users have to each others' data. Go to [Background Jobs](#) to monitor the progress of a change to an organization-wide default or a parallel sharing recalculation.

Manage sharing settings for: All Objects

[Disable External Sharing Model](#)

**Default Sharing Settings**

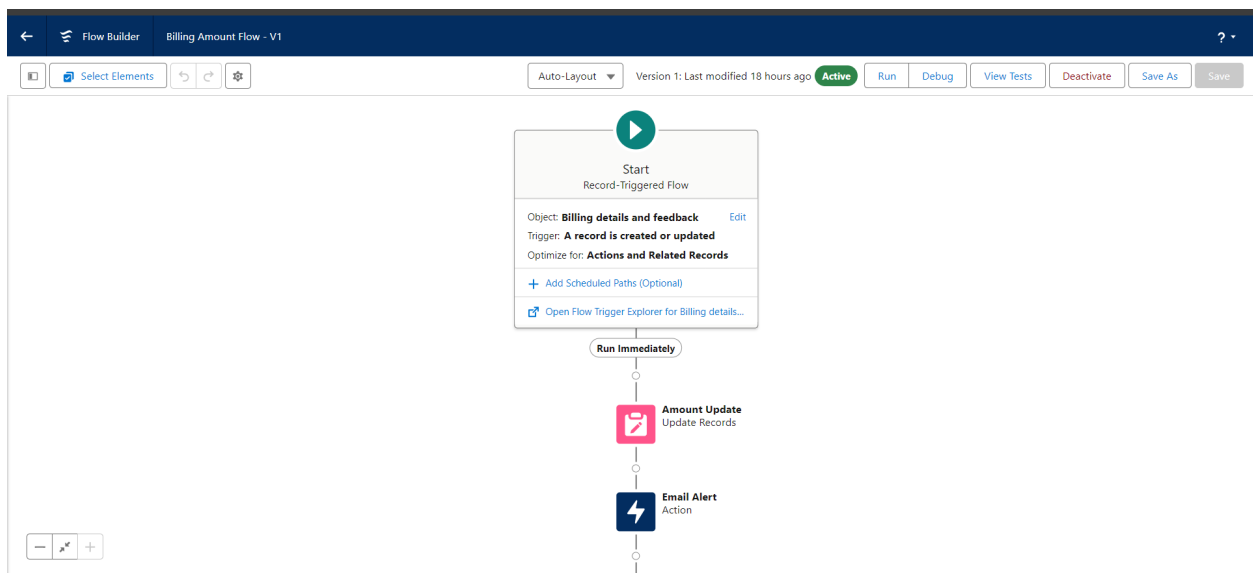

Object	Default Internal Access	Default External Access	Grant Access Using Hierarchies
Lead	Public Read/Write/Transfer	Private	✓
Account and Contract	Public Read/Write	Private	✓
Contact	Controlled by Parent	Controlled by Parent	✓
Order	Controlled by Parent	Controlled by Parent	✓
Asset	Controlled by Parent	Controlled by Parent	✓
Opportunity	Public Read/Write	Private	✓
Case	Public Read/Write/Transfer	Private	✓
Campaign	Public Full Access	Private	✓
Campaign Member	Controlled by Campaign	Controlled by Campaign	✓

## TASK 13: FLOWS

### Create A Flow

- Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.
- Select the Record-triggered flow and Click on Create.
- Select the Object as "Billing details and feedback" in the Drop down list.
- Select the Trigger Flow when: "A record is Created or Updated".
- Select the Optimize the flow for: "Actions and Related Records" and Click on Done.
- Under the Record-triggered Flow Click on "+" Symbol and In the Drop down List select the "Update records Element".
- Give the Label Name : Amount Update
- Api name : is auto populated Set a filter condition : All Conditions are met(AND)
- Field : Payment\_Status\_\_c
- Operator : Equals
- Value : Completed
- And Set Field Values for the Billing details and feedback Record
- Field : Payment\_Paid\_\_c
- Value : {!\$Record.Service\_records\_\_r.Appointment\_\_r.Service\_Amount\_\_c}
- Click On Done.
- Before creating another Element. Create a New Resource form Toolbox form top left.

18. Click on the New Resource, And select Variable.
19. Select the resource type as text template.
20. Enter the API name as " alert".
21. Change the view as Rich Text ? View to Plain Text.
22. In body field paste the syntax that given below. Dear  
`{!$Record.Service_records__r.Appointment__r.Customer_Name__r.Name}`,  
 I hope this message finds you well. I wanted to take a moment to express my sincere gratitude for your recent payment for the services provided by our garage management team. Your prompt payment is greatly appreciated, and it helps us continue to provide top-notch services to you and all our valued customers.  
 Amount paid : `{!$Record.Payment_Paid__c}`  
 Thank you for Coming
23. Click done.
24. Now Click on Add Element , select Action.
25. Their action bar will be opened in that search for " send email " and click on it.
26. Give the label name as " Email Alert"
27. API name will be auto populated.
28. Enable the body in set input values for the selected action.
29. Select the text template that created , Body : `{!alert}`
30. Include recipient address list select the email form the record.
31. RecipientAddressList:  
`{!$Record.Service_records__r.Appointment__r.Customer_Name__r.Gmail__c}`
32. Include subject as " Thank You for Your Payment - Garage Management".
33. Click done.
34. Click on save. Give the Flow label , Flow Api name will be auto populated.
35. And click save, and click on activate

## TASK 14: APEX TRIGGER

### Apex Handler UseCase :

This use case works for Amount Distribution for each Service the customer selected for there Vehicle.

1. Login to the respective trailhead account and navigate to the gear icon in the top right corner.
2. Click on the Developer console. Now you will see a new console window.
3. In the toolbar, you can see FILE. Click on it and navigate to new and create New apex class.
4. Name the class as "AmountDistributionHandler".

```
1 public class AmountDistributionHandler {
2
3     public static void amountDist(list<Appointment__c> listApp){
4         list<Service_records__c> serlist = new list<Service_records__c>();
5
6         for(Appointment__c app : listApp){
7             if(app.Maintenance_service__c == true && app.Repairs__c == true && app.Replacement_Parts__c == true){
8                 app.Service_Amount__c = 10000;
9             }
10            else if(app.Maintenance_service__c == true && app.Repairs__c == true){
11                app.Service_Amount__c = 5000;
12            }
13            else if(app.Maintenance_service__c == true && app.Replacement_Parts__c == true){
14                app.Service_Amount__c = 8000;
15            }
16            else if(app.Repairs__c == true && app.Replacement_Parts__c == true){
17                app.Service_Amount__c = 7000;
18            }
19            else if(app.Maintenance_service__c == true){
20                app.Service_Amount__c = 2000;
21            }
22            else if(app.Repairs__c == true){
23                app.Service_Amount__c = 3000;
24            }
25            else if(app.Replacement_Parts__c == true){
26                app.Service_Amount__c = 5000;
27            }
28        }
29    }
30 }
31 }
```

### Trigger Handler :

#### How to create a new trigger :

1. While still in the trailhead account, navigate to the gear icon in the top right corner.
2. Click on developer console and you will be navigated to a new console window.
3. Click on File menu in the tool bar, and click on new? Trigger.
4. Enter the trigger name and the object to be triggered.
5. Name : AmountDistribution
6. sObject : Appointment\_\_c

A screenshot of the 'New Apex Trigger' dialog box in Salesforce. It has a title bar with a close button. Inside, there are two labels: 'Name:' followed by a text input field, and 'sObject:' followed by a dropdown menu. At the bottom right, there is a 'Submit' button.

**New Apex Trigger**

Name:

sObject:

Submit

Syntax For creating trigger :

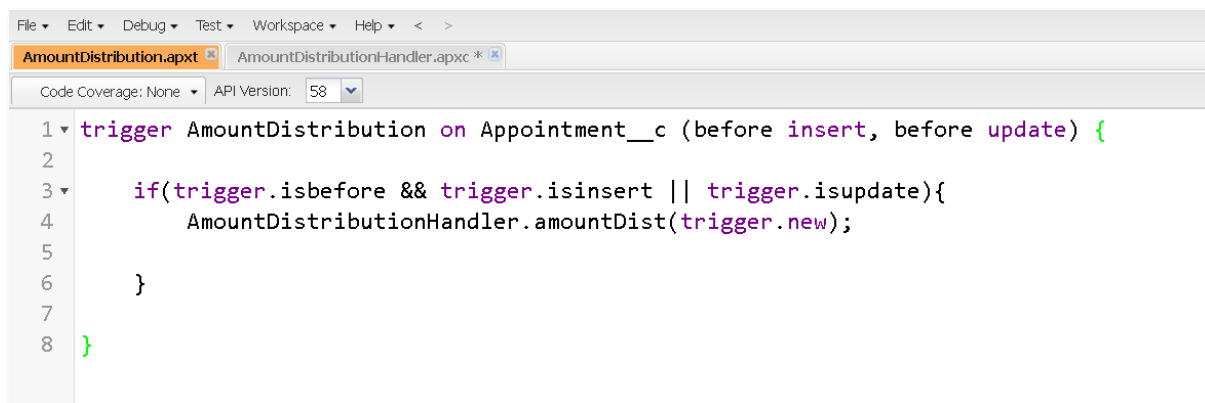

The syntax for creating trigger is :

Trigger [trigger name] on [object name]( Before/After event)

```
{  
}
```

In this project , trigger is called whenever the particular records sum exceed the threshold i.e minimum business requirement value. Then the code in the trigger will get executed.

### 1. Handler for the Appointment Object

A screenshot of an IDE window showing two tabs: 'AmountDistribution.apxt' and 'AmountDistributionHandler.apxc'. The 'AmountDistribution.apxt' tab is active. The code is an Apex trigger for the Appointment\_\_c object, triggered before insert and before update. It contains a conditional statement that calls a handler method if the trigger is before insert or before update.

```
File Edit Debug Test Workspace Help < >  
AmountDistribution.apxt AmountDistributionHandler.apxc *  
Code Coverage: None API Version: 58  
1 trigger AmountDistribution on Appointment__c (before insert, before update) {  
2  
3     if(trigger.isbefore && trigger.isinsert || trigger.isupdate){  
4         AmountDistributionHandler.amountDist(trigger.new);  
5     }  
6 }  
7  
8 }
```

Code:

```
trigger AmountDistribution on Appointment__c (before insert, before update) {
```

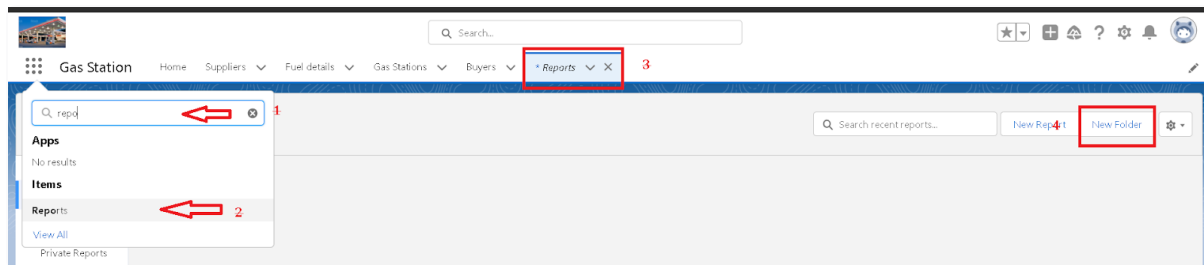

```
    if(trigger.isbefore && trigger.isinsert || trigger.isupdate){  
        AmountDistributionHandler.amountDist(trigger.new);
```

```
    }
```

```
}
```

## create a report folder

1. Click on the app launcher and search for reports.
2. Click on the report tab, click on new folder.

3. Give the Folder label as "Garage Management Folder", Folder unique name will be auto populated.
4. Click save.

**Create folder**

\*Folder Label

Garage Management Folder

\*Folder Unique Name

GarageManagementFolder

## Sharing a report folder

1. Go to the app >> click on the reports tab.
2. Click on the All folder , click on the Drop down arrow for Garage Management folder, and Click on share.
3. Select the share with as "roles", in name field search for "manager", give "view" as access for that role.
4. Then click share, and click on Done.

## Create Report Type

1. Go to setup >> type users in quick find box >> select Report Type >> click on Continue.
2. Click on new custom report type.
3. Select the Primary object as " Customer details" .
4. Give the Report type Label as " Service information "
5. Report type Name is autopopulated.
6. Keep the Description as same.
7. Select Store in Category as " other Reports "
8. Select the deployment status as " Deployed ", click on Next.
9. now , Click on Related object box.
10. Click on Select Object, choose Appointment Object as shown in fig.
11. Again Click to relate another object.
12. And select the related object as " service records".
13. Repeat the process and select the related object as " Billing details and feedback".

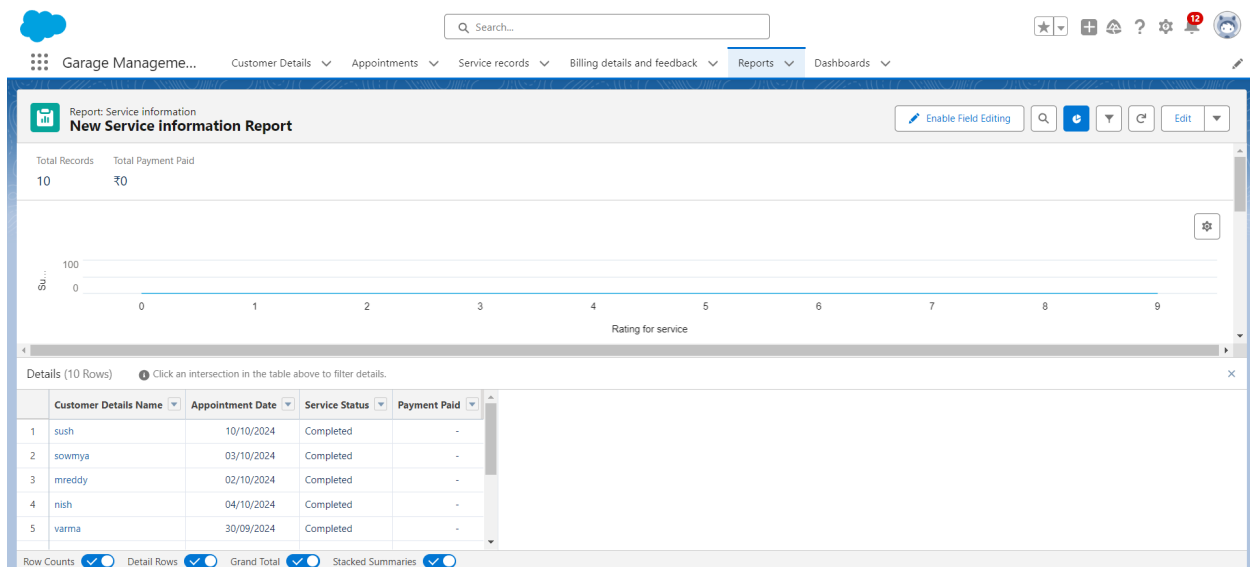

14. And click on save.

## Create Report

**Note : Before creating report, create latest "10" records in every object.**

**Try to fill every field in each record for better experience.**

1. Go to the app >> click on the reports tab
2. Click New Report.
3. Select the Category as other reports, search for Service Information, select that report, click on it. And click on start report.
4. Their outline pane is opened already, select the fields that mentioned below in column section.
  1. Customer name
  2. Appointment Date
  3. Service Status
  4. Payment paid
5. Remove the unnecessary fields.
6. Select the fields that mentioned below in GROUP ROWS section.
  1. Rating for Service
7. Select the fields that mentioned below in GROUP ROWS section.
  1. Payment Status
8. Click on Add Chart , Select the Line Chart.
9. Click on save, Give the report Name : New Service information Report
10. Report unique Name is auto populated.
11. Select the folder the created and Click on save.

The screenshot displays the 'Garage Management' system interface. At the top, there is a navigation bar with a search bar and various icons. Below the navigation bar, the 'Reports' tab is selected, showing a 'New Service information Report'. This report includes a table with columns for 'Rating for service', 'Payment Status', 'Completed', and 'Total'. Below this, a 'Details' section shows a table with columns for 'Customer Details Name', 'Appointment Date', 'Service Status', and 'Payment Paid'. At the bottom, there are checkboxes for 'Row Counts', 'Detail Rows', 'Grand Total', and 'Stacked Summaries', all of which are checked.

Rating for service	Payment Status	Completed	Total
<input type="checkbox"/> 5	Sum of Payment Paid Record Count	₹0 1	₹0 1
<input type="checkbox"/> 6	Sum of Payment Paid Record Count	₹0 1	₹0 1
<input type="checkbox"/> 7	Sum of Payment Paid Record Count	₹0 1	₹0 1
<input type="checkbox"/> 8	Sum of Payment Paid Record Count	₹0 1	₹0 1
<input type="checkbox"/> 9	Sum of Payment Paid Record Count	₹0 1	₹0 1

	Customer Details Name	Appointment Date	Service Status	Payment Paid
1	sush	10/10/2024	Completed	-
2	sowmya	03/10/2024	Completed	-
3	mreddy	02/10/2024	Completed	-
4	nish	04/10/2024	Completed	-
5	varma	30/09/2024	Completed	-

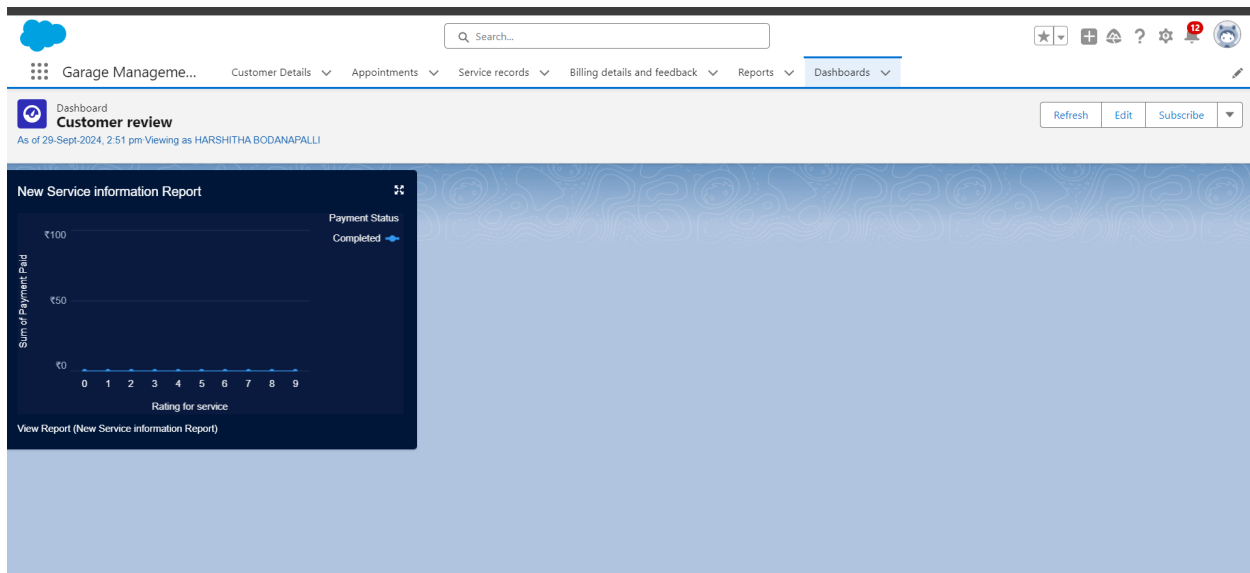

Row Counts ☒ Detail Rows ☒ Grand Total ☒ Stacked Summaries ☒

## Create Dashboard Folder

1. Click on the app launcher and search for dashboard.
2. Click on dashboard tab.
3. Click new folder, give the folder label as " Service Rating dashboard".
4. Folder unique name will be auto populated.
5. Click save.

## Create Dashboard

1. Go to the app >> click on the Dashboards tabs.
2. Give a Name and select the folder that created, and click on create.
3. Select add component.
4. Select a Report and click on select.
5. Select the Line Chart. Change the theme.
6. Click Add then click on Save and then click on Done.
7. Preview is shown below.
8. After that Click on Subscribe on top right.
9. Set the Frequency as " weekly ".
10. Set a day as monday.
11. And Click on save.
